PROFESSIONAL SUMMARY

Frontend Software Engineer with 5+ years of experience building scalable, user-focused web applications across e-commerce, hospitality, and interactive platforms. Specialized in Angular, Svelte/SvelteKit, React, and TypeScript, with experience owning frontend architecture, modernizing legacy applications, and developing complex product features from concept to production.

Focused on creating intuitive user experiences, writing maintainable code, and bridging the gap between engineering, product, and design.

SKILLS

- **Frontend Engineering:** Angular, Svelte/SvelteKit, React, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **UI & Product Development:** Interactive Dashboards, Design Systems, Drag-and-Drop Interfaces, Responsive UI, Performance Optimization
- **APIs & Integrations:** REST APIs, Authentication Flows, Payment Integrations, Node.js
- **Databases & CMS:** MySQL, MongoDB, Firebase, Sanity, WordPress, Headless CMS
- **Tools & Workflow:** Git, GitHub, Vercel, Netlify, Figma, Agile Development
- **Languages:** Spanish (Native), English (Professional)

WORK EXPERIENCE

Software Developer — Just Some Coding LTD

Remote | Malta

Jan 2023 – Present

- Owned frontend development across multiple production applications using **Svelte, Angular, and TypeScript**, delivering platforms across e-commerce, hospitality, and gaming industries.
- Led the **migration** of an established pharmacy e-commerce platform from Angular to Svelte as the sole frontend engineer, modernizing legacy code into a scalable component-based architecture.
- Rebuilt core e-commerce experiences including **product catalog, shopping cart, authentication flows, and customer-facing features**, integrating frontend functionality with a headless WordPress backend.
- Developed and maintained **booking platforms** managing 130+ villa and apartment listings, supporting availability calendars, reservation workflows, and secure online payments through Trust Payments integration.
- Developed a Svelte-based operations platform for a VR gaming system, integrating authentication, live game controls, session management, player/team configuration, contract workflows, and dynamic leaderboard updates.
- Built an interactive content creation system for game creators, featuring drag-and-drop card/deck management, asset handling, reusable workflows, and JSON exports for Unreal Engine integration.
- Collaborated closely with backend engineers to design **API integrations**, connect external services, and deliver business-critical features across multiple production applications.

Programmer — INEGI

Remote | Aguascalientes, Mexico

Mar 2022 – Dec 2022

- Developed and maintained internal government data platforms enabling employees to access, analyze, and export census and survey information across different statistical domains.
- Designed advanced **SQL queries** for large-scale databases containing millions of records, transforming complex datasets into structured reports and downloadable Excel outputs.
- Built and enhanced application features using **Java, JavaScript, HTML, and SQL**, improving internal workflows for data consultation and reporting processes.
- Collaborated within a 5-person engineering team to debug applications, optimize database interactions, and ensure accuracy and reliability of critical statistical systems.

Junior Developer — Tekoestudio

Hybrid | Aguascalientes, Mexico

Jul 2019 – Feb 2022

- Delivered 7+ custom web applications for clients across multiple industries, developing responsive interfaces and dynamic solutions using JavaScript, Vue.js, Angular, PHP, and SQL.
- Built and maintained WordPress and headless CMS solutions, enabling clients to manage content efficiently through customized platforms.
- Collaborated with designers and clients throughout the development lifecycle, from requirements gathering to deployment and maintenance.

SELECTED PROJECTS

Layout Alemán — Freelance Project

Designed and developed a custom SvelteKit website with an integrated CMS, allowing administrators to manage bilingual content, create and publish projects, update website information, and handle customer inquiries through automated email notifications.

EDUCATION

Computer Science Engineer

Universidad Autónoma de Aguascalientes

2017 – 2021
